Senior Frontend Engineer specializing in accessibility, design systems and data visualization, with 9+ years bridging the gap between design and engineering to deliver modern and inclusive web products.

Skills & Technologies

Frontend: HTML, CSS, JavaScript, TypeScript, React, D3.js, Web Components
Design Systems: Design Tokens, Figma (Variables, Branching, Variants), Storybook, Style Dictionary, Zeroheight
Web Accessibility: WCAG, ARIA, RGAA, Accessibility testing (manual & automated)
Tooling & Testing: Git, CI/CD, Cypress, Axe, Vitest, AI-assisted development (Claude Code)

Work Experience

pass Culture – **Senior Frontend Developer: Design System & Accessibility** (Paris, France)

Jul. 2023 - Nov. 2025

- Architected and launched an accessible-first design system, including a three-tier multiple themes, brands and platforms (React & React Native) tokens system and a component library used by 20 developers and 8 designers across 7 teams.
- Took charge of previous accessibility (a11y) audits results, and went from a legacy app with 40% RGAA (French WCAG 2.1 AA) compliance, to +70% in one year.
- Set up multi-layer accessibility defensive testing ci strategy (axe-core unit, E2E checks, static analysis rules).

Manadge – **Frontend Software Engineer** (Paris, France)

Oct. 2019 - Jun. 2023

- Led the frontend from first employee to acquisition by iHeartMedia, building the core Angular SaaS platform and backoffice from scratch, and mentoring another developer.
- Developed and designed reusable styles and a component library to standardize the company web apps.
- Built a highly interactive and customizable modular dashboards system for large-scale time-series datasets.

Selected Freelance Projects – **Senior Frontend Engineer** (Remote)

2018 - present

- Created interactive world maps for investigative journalism outlets (Forbidden Stories, Public Eye & Unearthed Greenpeace UK).
- Built web apps, and interactive data visualizations (elections sentiment evaluation system at Neuftek in Taiwan, data visualization dashboards, etc.).
- Participated in open source development of data-navigator, a JS a11y layer that makes web dataviz components navigable.

IBM France – **Frontend Technical consultant: Analytics & IoT** (Paris, France)

Feb. 2017 - Jan. 2019

- Helped build web apps to improve Cognac aging processes at Hennessy (LVMH), and visualized data to optimize L'Oréal's line operations.

Education

Master’s degree in computer science & telecommunications – Télécom SudParis (Paris, France) *2014 - 2017*

Maths & physics preparatory classes for the grandes écoles – Lycée Chaptal (Paris, France) *2012 - 2014*

Baccalauréat in Sciences (British A-Level) – Lycée Saint-Paul (Vannes, France) *2009 - 2012*
